WASHINGTON, D. C.

THIS LOOKS GOOD

WHAT SHOULD THE COUNTY AGENT KNOW BEFORE TAKING UP THE WORK IN A COUNTY ?

The enclosed mimeographed circular has recently been issued by the Office of Extension Work in the Southern States and it is believed it will be of interest to county agent leaders in the North and West. We have just returned from a five weeks trip through thirteen of the Southern States during which we visited twenty-eight county agents. County agents as a class appear to be much the same the world over in the way they look at things and in the requirements they need to make good in their positions. The summary of the reports of the fifty county agent supervisors in the South will be of interest to Northern leaders in the study which they are making of their own leadership problems and in the development of high class personnel in the counties.
